Year Round

Optimal Survey Window

This calendar includes optimal survey periods for some of the rare species of North Carolina that may need addressing for your development projects. Since species and survey requirements vary, professional advice is recommended. Surveys should be conducted by qualified, and where necessary, licensed or permitted individuals. Visit <https://ecos.fws.gov/ecp/> for a complete list of protected species. T-Threatened, E-Endangered, (\*)-Proposed T or E
